SUMMARY OF THE REASONS FOR DECISION:

The computer image file entitled *Assfst18.jpg* is classified as:
Objectionable.

The publication is a colour photographic image. It consists of a close-up depiction of a female's anus and vagina being penetrated by (respectively) another female's hand, and a penis.

The image is objectionable because of the extent and degree to which it degrades and dehumanises its subjects, in particular the female whose vagina and anus are being penetrated. This female is dehumanised because the degree of focus on her anus and vagina precludes any sense of her as a whole person, with attributes other than the purely sexual. The female is degraded because she is presented as a spectacle, undertaking intense vaginal and anal penetration in order to sexually titillate the viewer.

The right to freedom of expression set out in s14 of the New Zealand Bill of Rights Act 1990 has been considered in relation to this publication. It is considered that the level of restriction placed on the publication is reasonable. This is because the extent and degree to which the publication degrades and dehumanises its participants is so high as to mean its availability is likely to be injurious to the public good.
